about

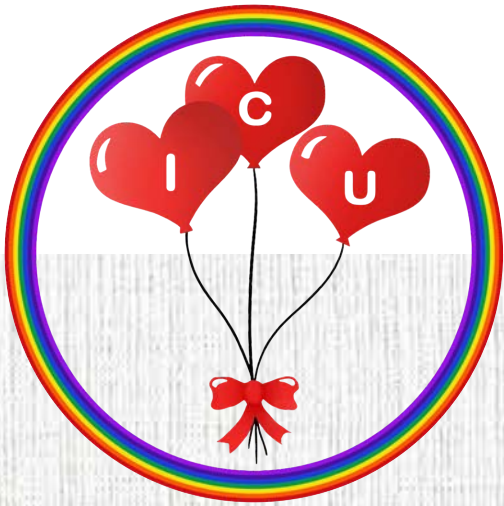

the academy

ICU Academy was founded by Nicola Farmer to assist children to align with and develop their natural abilities that educational institutions are unable to offer.

The ICU Programme is an additional form of learning alongside mainstream education to assist children to grow in confidence and give them the skills to enhance their learning abilities in many other areas of their lives so they can realise their potential.

ICU Academy was set to up to assist children to become the best version of themselves, to align them with their future and offer them a start in life that many generations before didn't have the opportunity to experience.

Our children are the future generations who can and will lead us into the light of peace, harmony and new ways of being.

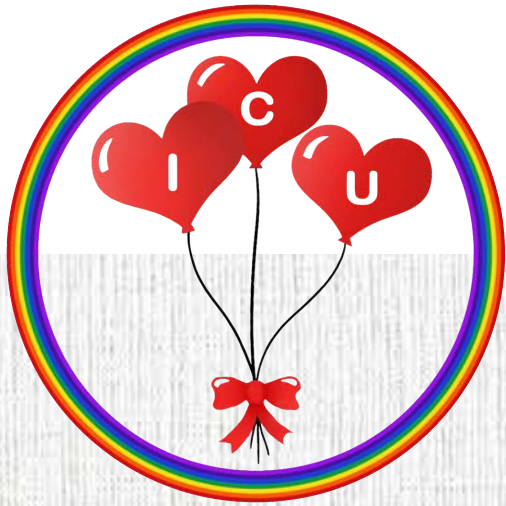

about

nicola farmer

Nicola Farmer has a wealth of experience in teaching and is passionate when it comes to facilitating changes in peoples lives. She is heart centred and loves to see the changes that people go through and the improvements that they experience when they grow in confidence and self esteem. She has the ability to adapt to people of all ages and levels of abilities and has a great sense of empathy and compassion for the evolution of humanity.

Nicola developed this NEW & EXCITING method of teaching, having channeled from a higher source. She loves teaching the children to work with their natural abilities and is carrying out these new teachings with great success. She knows in her heart that ALL children everywhere need this type of guidance and teaching. There are millions of children in the world today and no one person can reach them all. She has successfully created a worldwide Teacher Training Programme to enable her dream of reaching as many children as possible.

chapter 01

the programme

The Teaching Programme is attended for 10 to 12 one hour sessions, during which a child will learn to read, play games and is encouraged to be creative wearing a blindfold. He/she will also engage with many other fun activities, whilst being praised for everything he/she does, to increase levels of confidence, self-esteem, self-worth and many other important social and life qualities. This program allows students to access both right and left hemispheres of the brain, enabling the ability to integrate logic and creativity simultaneously.

Children attend individually for development sessions and then in group settings post development training, facilitated by a qualified ICU Academy Teacher. Various activities and learning tools are used during a session, including Books, Puzzles, Games, Mindfolds, iPads, Computers, Art Materials, Building Bricks/Blocks, Moulding Clay, Jewellery Pieces, Picture/Playing Cards and any other tools that are fun and stimulating.

The ICU Programme is a pioneering technique for children's development, addressing their educational, emotional, mental and spiritual needs. It facilitates an ability with the children to align with all their natural abilities, bringing into alignment the human mind (logic) and the outer consciousness (creative) so they can function in a more balanced way.

ICU offers children and their families an opportunity to become more aware of life and what can be achieved when in Unity. This programme has successfully brought science and spirituality together, where many have failed throughout history. Our practice does exactly that and at a grass roots level with our children.

chapter 02

the benefits

The ICU Programme assists children to:

Release limiting beliefs and traumas.

Increases confidence, self-esteem, self-respect and respect for others.

Expand their minds to reach educational and personal potential.

Develop their natural gifts.

Understand universal human values.

The ICU Programme:

Expands the children's consciousness and raises their vibration.

Improves memory and concentration and increases attention span.

Strengthens their resilience, awakens and/or improves their intuition.

Awakens skills they didn't know they had and activates their ability to see, read and play without their physical eyes.

Who, How, Where & When

Children attend between 10 & 12 sessions, every 3rd day, weekly or fortnightly.

Children are taught 1:1, in person and may only be taught in pairs and groups when their level of competency is established. This is not an online programme.

This programme is available for children between the ages of 5 & 12, who can read and know colours and shapes, depending on their abilities and levels of maturity.

chapter 03

the children

Children who have experienced this pioneering programme have benefited in many ways, along with their families.

We have many stories to share where children have gone beyond their perceived capabilities, surprising parents, families, friends and teachers. We have seen children heal from physical and mental challenges, educational expectations exceeded, logic and creative balance. Many parents report how their children have become more loving and interactive, kind and confident.

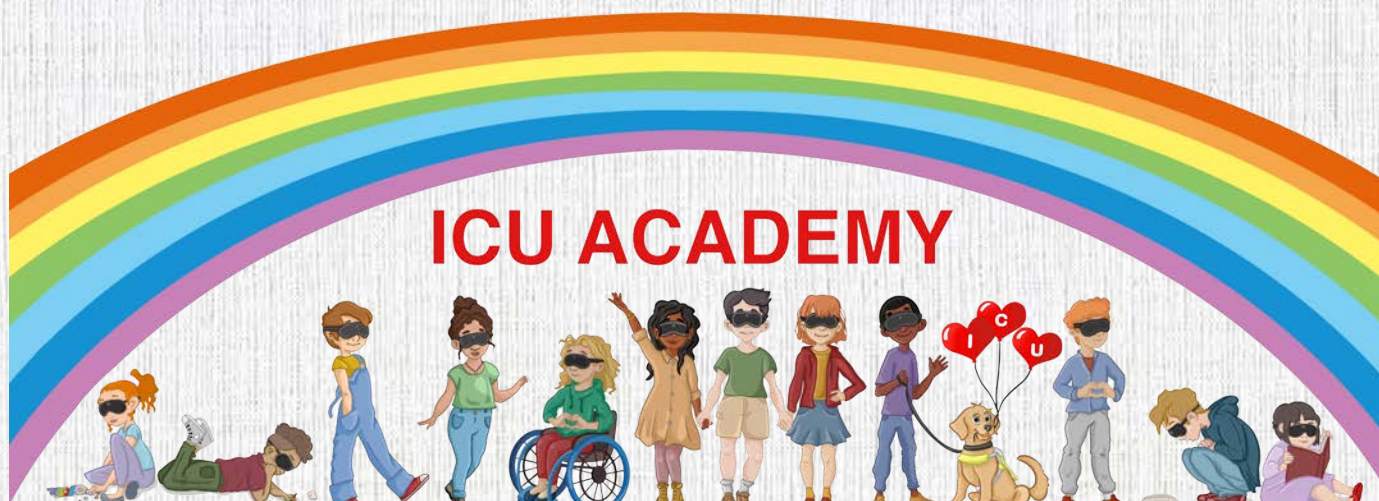

One very special story is about a child whose parents were going through a very unpleasant divorce and it was creating chaos in the family. By the end of the ICU programme for one of their children the parents had fallen in love again.

One Child taking the course can have a profound effect on a family, community, town, country and the world.

This groundbreaking training is about the quality of the teaching and not about quantity.

We have within the palms of our hands and hearts a complete application that will give children an opportunity to change the world.

“The Children Are Our Future”

chapter 04

teacher training

Do you have a calling to work with children?

Does your heart beat faster when you know there's a better way?

Do you choose to carve a path for future generations?

Do you feel with all your heart that children need more?

Do these questions ignite a passion to create a better world?

If you can answer “yes” to the above questions then you could be about to embark on a unique journey that will assist children and the evolution of Humanity, Earth and the Universe.

You will enter into a pioneering experience, that has the potential to be life changing, share the training with a group of like hearted people, gain an understanding of how we can enable the changes the children need, embark on a journey of self discovery and gain the necessary skills to become an ICU Teacher.

chapter 05

what they have to say

Testimonial headings from teachers who have taken the training.

“A global sense of community that I loved”

“I gained a skill that feels incredibly important right now”

“The course was the most enlightening wonderful experience”

“I knew straight away that I wanted to do it”

“It feels like a gift”

“Looking forward to help raise the vibration of love”

chapter 06

discovering me

This newly created course offers energetic and creative guidelines along with exercises to assist children and teenagers with various mental, emotional and spiritual challenges that may be preventing them from living a natural and fulfilled life.

Using practical and dynamic exercises we can guide children and teenagers to understand their energy, how to align and work with it to improve their emotional wellbeing and enable them to feel 'in control'. A 'Discovering Me' Practitioner supports the children to identify and comprehend bullying and teaches them how to self-empower and self-heal.

The practices are spread over a number of sessions, depending on what speed a child/teenager needs to go and how he/she is progressing.

chapter 07

what's next

Whether you're a parent, child or a curious person you have come across a practice that is extraordinary in many ways. People find it hard to believe that a child seeing, reading and playing completely blindfolded is beyond possibility.

Well let us tell you it is completely possible and many children do. Not all children achieve this during the programme but ALL of them experience life changing moments that enable them to achieve any of their life purposes.

Your ability to have an open mind and heart is the first step to assisting us to change perceptions and possibilities. We're sure you'll have many questions and your curiosity is now very much peaked. You'll find more information on the website about teaching children and how to become a teacher, please use the following link and enjoy the journey.
